

02/21/2017

Public Service Electric & Gas Co.
4000 Hadley Rd., South Plainfield, NJ 07080

To whom this may concern:

This letter is a formal notice to inform you that Nelson Tree Service is a self-insured and certified line clearance sub-contractor for PSE&G. Nelson Tree Service personnel are permitted to perform required and necessary tree trimming line clearance tasks. Nelson Tree Service will be providing assistance to Princeton and Montgomery Townships by removing the crown and/or overhanging tree limbs that are in close proximity to our electrical facilities. Nelson Tree Service will be working in conjunction with the Municipalities to accomplish the task at hand. There will be no interruption in your electrical service while the line clearance operations are being performed. After Nelson Tree Service, a PSE&G certified line clearance contractor, has safely completed the required work, the work will be inspected by a forester employed by PSE&G to ensure all line clearance requirements have been established. After which, the Municipalities contractor of choice will complete the remainder of the required tree work. Work is scheduled to begin on Tuesday, 2/21/17, and may take several days for Nelson Tree Service to complete the work. For additional information regarding PSE&G's or Nelson Tree Service's assistance, please contact Scott Blocker @ 609-799-6831.

Regards,

Scott Blocker
